Overview

Testosterone Saliva Test

Product number: MV1009

Price

€29.00

Prices incl. VAT plus shipping costs

Description

Individual testosterone test for men or women

Testosterone, alongside androstenedione and DHEA in women and DHT (dihydrotestosterone) in men, is a main representative of the androgens (male hormones). Over 95% of testosterone in men is produced in the testes, the remainder is of adrenal origin (formed by the adrenal gland: "Glandula adrenalis"). In women, half of the testosterone is produced in the adrenal glands and the other half in the ovaries.

Effects (excerpt):

Decreased secretion:

• Leads to fatigue • reduced performance • loss of drive • muscle wasting • fat accumulation • obesity • sexual disorders (loss of libido) • increased cholesterol levels • exacerbation of depression • increased risk of osteoporosis • increased risk of developing Alzheimer’s disease • reduced spermatogenesis (sperm production), consequence: infertility

Excessive secretion:

Increased hair growth, virilisation (women), elevated testosterone levels (women), inner restlessness, irritability, increased potential for aggression

The test kit includes:

- 1 saliva collection guide
- 3 saliva tubes (Saliva)
- 3 straws
- 3 labels Sample 1-3 printed with "Name, Date, Time"
- 1 shipping container
- 1 shipping envelope

How does the ordering process work?

After your order, the requested test package will be sent to you with detailed instructions. You place your sample into a sample tube, send it in a prepared envelope to Medivere's partner laboratory GANZIMMUN Diagnostics GmbH and receive a report with the assessment of your profile after 5-7 days.
