To 1	€49.95	€333.00 / 1 Kilogramm
To 4	€47.40	€316.00 / 1 Kilogramm
From 5	€44.90	€299.33 / 1 Kilogramm

Prices incl. VAT plus shipping costs

Description

Dietary supplement specially developed for men

It contains the unique, patented fenugreek extract Testofen®, whose efficacy has been confirmed in numerous human studies. The efficacy of the ashwagandha extract (KSM-66®) is also well supported by numerous scientific studies. The men’s formula Pro Testosteron contains zinc, which can be used to support male hormone levels and a normal testosterone level1, as well as selenium, ashwagandha and maca, which contribute to fertility2.

Male hormones

The most important sex hormone in men is testosterone. The main site of production is the testes, where it is produced under the influence of the pituitary hormone LH (luteinising hormone). Testosterone gives the male body its typical characteristics. It is also of great importance for male sexuality and fertility. Men should pay particular attention to supporting their testosterone levels from the age of 35. A supplement containing zinc, such as Männerformel Pro Testosteron, can contribute in addition to a healthy lifestyle. The other nutrients in Männerformel Pro Testosteron each contribute in their own way to male fertility, sexual function and vitality.

Fenugreek

Fenugreek (Trigonella foenum-graecum) is also known as 'Greek hay'. Both the leaves and the seeds are used in cooking. The manufacturer Gencor Pacific Limited has developed a fenugreek extract marketed under the name Testofen®, which can be used as a dietary supplement. The product is a patented extract standardised to a unique active complex called Fenuside™, consisting of several saponins. Naturally occurring phytonutrients in fenugreek are saponins. Numerous human studies have also been conducted with Testofen®.

Ashwagandha

Ashwagandha (Withania somnifera) is an herbal preparation with many uses. It is an herb that fits well into a men’s formula and can be used in addition to its broad support for vitality and endurance. Ashwagandha supports male sexual function and improves sperm quality as well as fertility. The manufacturer Ixoreal supplies the ashwagandha extract marketed as KSM-66®, which Vitals uses. The development of this specialised extract was based on fourteen years of research. With ashwagandha it is crucial that the full spectrum of active compounds is obtained from the root and not just the withanolides. The effect of the preparation ultimately relies on the synergy of the different components. A customised extraction process is used to produce KSM-66® that does not use toxic or environmentally harmful solvents. This yields a broad-acting extract that preserves the natural properties of the source plant. KSM-66® is not only the highest-quality ashwagandha extract but also the most thoroughly researched and scientifically substantiated worldwide.

Maca

Maca is a root vegetable that grows naturally at high altitudes in the Peruvian Andes. What many do not know is that maca comes in different varieties that differ in their phytochemical composition and effects. The different maca types are distinguished by the colour of the tuber, which can be yellow, red or black, among others. Due to the specific proportions of their characteristic constituents (such as glucosinolates and lignans), black maca is considered a typical 'men’s maca'. Yellow maca (with different glucosinolates) is regarded more as 'women’s maca'. The men’s formula Pro Testosteron under the brand name Maca-OG™ mainly contains this black maca in a 10:1 concentrate. Maca is known to increase sexual desire. Similar to ashwagandha, it supports sperm quality, fertility and sexual function.

Zinc

In the men’s formula Pro Testosteron, zinc is an important trace element. Zinc is known to contribute to the maintenance of a normal testosterone level in the blood. Zinc directly influences the production, storage and release of testosterone. Zinc is also necessary to release LH, which in turn is responsible for testosterone production. Zinc thus contributes to a normal hormonal balance. Zinc is also involved in the formation of sperm cells and is therefore beneficial for male fertility. A well-absorbed form of zinc bisglycinate was used in Männerformel Pro Testosteron, in which zinc is bound to the amino acid glycine. The dose has been deliberately chosen not to be too high so that this product can also be safely used together with a multivitamin that already contains zinc.

Selenium

In addition to zinc, the men’s formula Pro Testosteron also contains a safe dose of the trace element selenium. By supporting sperm motility, selenium contributes to high-quality sperm. Like zinc, it has antioxidant properties and can help protect cells (including sperm cells) from oxidative damage. L-selenomethionine, a form of selenium with good absorption, is bound to the amino acid L-methionine.

Nutritional properties

- Zinc contributes to the maintenance of a normal testosterone level in the blood.
- Zinc and selenium are beneficial for sperm quality and male fertility.
- Zinc and selenium help protect body cells from oxidative damage.

Nutritional declaration

Micronutrients	**per daily portion (2 tablets)**
Zinc	5 mg (50 %*)
Selenium	27.5 µg (50 %*)

*Reference intake according to Regulation (EU) No 1169/2011

Active ingredients

Active ingredients*	**per daily portion (2 tablets)**
Maca (Maca-OG®, 0.3 % glucosinolates)	600 mg
Ashwagandha extract (KSM-66®, 5 % withanolides)	600 mg
Fenugreek extract (Testofen®, 50 % Fenuside™)	600 mg

* No reference amount is specified under the FIC
KSM-66® is a registered trademark of Ixoreal Biomed Inc. Testofen and Fenuside™ are registered trademarks of Gencor Pacific Limited. Maca-GO™ is a registered trademark of Natural Health International. TRAACS (The Real Amino Acid Chelate System) is a registered trademark of Albion Minerals.

Ingredients

Filling agent (microcrystalline cellulose [cellulose gel]), ashwagandha extract (Withania somnifera, root [contains **milk**]), fenugreek extract (Trigonella foenum-graecum, seeds), maca (Lepidium peruvianum Chacón, root), anti-caking agents (calcium salts of fatty acids, silicon dioxide), minerals (zinc, selenium), coating agents (hydroxypropylmethylcellulose, glycerol, hydroxypropylcellulose).

Recommended use

Take 1 tablet twice a day with water at a meal.

If you have an overactive thyroid or are taking thyroid medication, consult a doctor before using a supplement containing ashwagandha. Do not use during pregnancy or breastfeeding.

Storage instructions

Store in a cool, dry place away from light (do not refrigerate).

Legal notice

The recommended daily intake should not be exceeded. Food supplements are not a substitute for a balanced and varied diet and a healthy lifestyle. Keep out of reach of young children.

Product information

Application:	Love life, Men
Dosage form:	As a tablet.
Micronutrients:	Selenium, Zinc
Plants:	Ashwagandha, Fenugreek, Maca
Quality:	Free from magnesium stearate, Gluten-free, Lactose-free, Vegan
Allergens:	Milk
Product type:	Dietary supplements
Name of the foodstuff:	Dietary supplements containing plant extracts and other plant-based substances
