Overview

Elemental Selenium, 60 ml

Product number: VS4485

Price

Quantity	Unit price	Base price
To 1	€17.95	€299.17 / 1 Liter
To 2	€17.00	€283.33 / 1 Liter
From 3	€16.15	€269.17 / 1 Liter

Prices incl. VAT plus shipping costs

Description

High-dose selenium in liquid form

Versatile selenium – selenium occurs as a trace element in numerous enzymes and therefore has many functions in our body. It is, among other things, a component of antioxidant enzymes, contributes to a normally functioning immune system and to normal hair and nails. It is also particularly well known for its role in the thyroid. There it acts as a co-factor in the conversion of the thyroid hormone T4 into the active T3 form. Selenium is essential for life but cannot be produced by the body itself. Therefore it must be supplied through the diet, making it advisable to pay particular attention to adequate intake.

Most of the selenium we get comes from plant foods, which in turn have taken it up from the soil. Unfortunately this is also where the problem lies: the selenium concentration of soils varies greatly regionally and beyond. Another source can be found in animal foods. However, this is understandably not an option for a vegetarian or vegan diet.

Vitals Selenium for direct effect

Vitals selenium is highly dosed and therefore particularly effective. The inorganic form (sodium selenate) provides a direct biological effect.
If you want to correct a general selenium deficiency, organic selenium yeast is particularly suitable. This works more indirectly and is better suited for refilling a long-term depleted store.
Selenium from sodium selenite, on the other hand, is immediately available and acts more precisely and accurately, but should therefore be dosed more deliberately and specifically. Especially economical and provides long-lasting support for selenium status.

Nutrient properties

- Selenium contributes to normal sperm production.
- Selenium contributes to the maintenance of normal hair.
- Selenium contributes to the maintenance of normal nails.
- Selenium contributes to the normal function of the immune system.
- Selenium contributes to normal thyroid function.
- Selenium helps protect cells from oxidative stress.

Nutritional declaration

Micronutrients	per daily serving 1 ml
Selenium	100 µg (182%*)

*Reference value according to Regulation (EU) No. 1169/2011

Ingredients

Purified water, sea water concentrate (CMD), acidifier (citric acid), sodium selenate, preservative (potassium benzoate [<0.1%]).

Recommended intake

Take 1 ml per day with the Opti-Dose dropper (1 pipette = 1 ml). Add the drops to (approx. 200 ml) water, fruit juice or food. Shake before use.

Storage instructions

Store in a cool, dry place, protected from light (do not refrigerate).

Legal information

The recommended daily intake should not be exceeded. Food supplements are not a substitute for a varied and balanced diet and a healthy lifestyle. Keep out of reach of young children.
