From 4	€59.90	€399.33 / 1 Liter

Prices incl. VAT plus shipping costs

Description

High-quality algae-based omega-3 oil – specially for people with a high vitamin D level

The Omega-3-plus preparation (without Vitamin D) combines high-quality algae oil, hemp seed oil and turmeric – deliberately without added Vitamin D. Perfect for those who already use a separate Vitamin D supplement, who want to adjust their Vitamin D level individually or who wish to avoid it deliberately – for example for health reasons. The oil contains 1173 mg omega-3 fatty acids per daily dose and is therefore suitable for adults and

children. The taste is pleasantly mild – the dosing is practical and hygienic.

Highlights:

- **Without added Vitamin D:** Perfect for people who already supplement Vitamin D separately and users who want to control or have their Vitamin D intake medically monitored.
- According to the official test report **1173 mg Omega-3 per daily dose:** Pure DHA and EPA from high-quality algae oil – for brain, heart and vision.
- **With hemp seed oil:** Provides omega-3 and omega-6 fatty acids in the optimal ratio of 1:3 – for balanced supply.
- **High-quality algae oil & turmeric:** 100% plant-based, sustainably sourced – with a mild lemony flavour and an innovative herbal complex.
- **For children and adults:** Family-friendly formulation – also suitable for children*.
- **Clean dosing:** Practical anti-drip closure for easy and hygienic portioning.

The contents are sufficient for a consumption period of at least one month.

Omega 3 plus (without Vitamin D) offers a well-thought-out combination of the high-quality oil of Schizochytrium algae, premium hemp seed oil, turmeric and Vitamin E. In addition our innovative herbal complex (18 herbs), which has numerous health-promoting properties. The formulation contains many omega-3 fatty acids, with DHA and EPA being strongly represented. They can be used directly by the human body and contribute to normal brain function, vision and heart function. In addition, they protect cells from oxidative stress and strengthen the immune system. Particularly suitable as a daily supplement for all family members. For adults and children with insufficient omega-3 fatty acid supply.

Omega-3-plus (without Vitamin D) deliberately contains no additional Vitamin D. The reason: numerous people already take Vitamin D supplements independently, either in a dosage tailored to them or on the recommendation of a doctor. Additional intake can also be undesirable or even contraindicated in certain health conditions. Therefore an omega-3 product without added Vitamin D offers you the necessary flexibility and safety to combine your supplements in a targeted and needs-based way.

The optimal omega-3 provider

The consumption of fish or the use of fish oil has so far been regarded as the ideal natural source of omega-3 fatty acids in humans. It is an apparent contradiction when one considers that most fish obtain their high omega-3 content from their food, the algae. Algae oil is a plant oil that is extracted directly from algae. It is one of the most effective natural sources of docosahexaenoic acid (DHA) and eicosapentaenoic acid (EPA). These are polyunsaturated fatty acids from the highly valuable omega-3 fatty acid class. Algae oil represents the obvious environmentally and animal-friendly alternative to fish oil – not only for vegetarians and vegans.

Turmeric and omega-3 fatty acids

Turmeric, which belongs to the ginger family, is also known as Indian saffron or the golden spice. The turmeric plant has tuberous, underground-growing rhizomes (rootstocks). The typical yellow colour is due to the so-called curcuminoids. e. These are secondary plant compounds that are extracted from the rhizomes. Due to its many positive properties, turmeric is now the subject of numerous studies.

Genuine lemon oil directly from Sicily

- Messina lemons from Sicily – ripened in the sun & particularly flavoursome
- 100% natural: No synthetic flavouring, but pure essential lemon oil
- Obtained by cold pressing for maximum freshness and nutrient content

- Refreshing: Promotes motivation and vigour

Nutritional declaration

Micronutrients	per daily portion 5 ml
Vitamin E**	12 mg α-TE (100 %*)

*Reference value according to Regulation (EU) No. 1169/2011
**Information on the Vitamin E content (α-TE = Total alpha-tocopherol equivalents)

Active ingredients

Active substances*	per daily portion 5 ml
Omega-3 fatty acids	1173 mg
– of which docosahexaenoic acid	505 mg
– of which eicosapentaenoic acid	220 mg
– of which docosapentaenoic acid	48 mg
– of which alpha-linolenic acid	400 mg
Hemp seed oil	500 mg
Turmeric rhizome powder	50 mg
Herb and spice extract	50 mg

* No reference amount is specified according to the FIC

Ingredients

Rapeseed oil, 22.3% algae oil (algae oil (Schizochytrium sp.), antioxidant (rosemary extract, ascorbyl palmitate, tocopherol), contains 55% omega-3 fatty acids, of which 30% docosahexaenoic acid and 15% eicosapentaenoic acid), hemp seed oil (Cannabis sativa), natural lemon flavour, turmeric rhizome powder (Curcuma longa), herb and spice extract (galanga extract (Alpinia officinarum), milk thistle extract (Silybum marianum), angelica extract (Angelica archangelica), gentian extract (Gentiana lutea), fennel extract (Foeniculum vulgare), caraway extract (Carum carvi), chamomile extract (Chamomilla recutita), star anise extract (Illicium verum), lemon balm extract (Melissa officinalis), dandelion extract (Taraxacum officinale), masterwort extract (Peucedanum ostruthium), juniper berry extract (Juniperus communis), wormwood extract (Artemisia absynthium), wild thyme extract (Thymus serpyllum), horsetail extract (Equisetum arvense), artichoke extract (Cynara scolymus), chicory extract (Cichorium intybus), hop extract (Humulus lupulus)), antioxidant (rosemary extract), d-alpha-tocopherol.

Recommended consumption

Take 5 ml daily undiluted with the main meal. Note: There is no age restriction for children. The intake recommendations for adults are authoritative. IMPORTANT: The oil should ideally always be taken with the main meal. Only when the food contains fat does fat digestion take place. This is necessary for omega-3 fatty acids to be absorbed effectively.
