Description

Phosphatidylserine with Choline and Inositol

Choline and inositol are classified with the B vitamins, although they are actually vitaminoids (vitamin-like substances) that our body can produce itself. As they have similar properties and complement each other in their effects, they should always be taken together. This combination product

- contains choline as bitartrate

- supports the formation of lecithin
- choline can cross the blood–brain barrier
- choline is a precursor of acetylcholine.

The vitaminoids choline and inositol

Choline and inositol are both needed for the formation of lecithin, the **building material of our cell membranes**. Therefore they are found throughout our body.

Choline is one of the few substances that can readily cross the blood–brain barrier. It can reach the nerve cells in the brain. In addition, choline promotes the production of the neurotransmitter acetylcholine when required.

Nutritional properties

- Choline contributes to normal homocysteine metabolism.
- Choline contributes to normal fat metabolism.
- Choline contributes to the maintenance of normal liver function.

Nutritional information

Micronutrients	per daily serving 1 capsule
Iron	2.1 mg (15 %*)
Zinc	1.5 mg (15 %*)

*Reference intake according to Regulation (EU) No. 1169/2011

Active ingredients

Active substances*	per daily serving 1 capsule
Phosphatidylserine	150 mg
Choline	50 mg
Inositol	50 mg

* No reference amount specified according to Regulation (EU) No. 1169/2011

Ingredients

Phosphatidylserine, choline L-bitartrate, hydroxypropyl methylcellulose (vegetarian capsule), curry leaf extract, inositol (from **maize**), zinc citrate.
