Description

Heart support with valuable herbs and thiamine

An optimally balanced blend of herbs, amino acids and thiamine, which contributes to **normal heart function**. But it is beneficial for more than that! It also contributes to normal energy metabolism, normal nervous system function and normal psychological function. The beneficial properties of thiamine are further enhanced by pomegranate, mistletoe, aronia and many other plant-derived ingredients. The mushrooms shiitake and almond mushrooms as well as the amino acids L-carnitine, L-arginine and coenzyme Q10 round off the blend.
