Description

Multivitamins and minerals with glucosamine for bones and cartilage from a vegan source

Bones and joints form the foundations of our body and carry us through everyday life. They do a lot and deserve special attention. Glucosamine is the most important building block of glycosaminoglycans, which together with collagen form the framework of our connective tissue. The amino sugar glucosamine is essential and ensures the elasticity and gliding properties of the articular cartilage. Glucosamine plus is aimed at those who should pay

particular attention to their bones and joints: for example older people, whose own glucosamine production decreases, and athletes who place high loads on bones and joints.

And the plus …

Glucosamine plus additionally contains valuable minerals and vitamins for an even higher-quality and optimal complex of nutrients. And the new formulation is completely VEGAN and uses only natural sources. In addition, Glucosamine Plus now also contains the trace element boron, giving the formulation even more nutritional value.

Nutritional properties

- Vitamin C contributes to normal collagen formation for the normal function of blood vessels, bones and cartilage, of teeth and gums, and of the skin.
- Vitamin E contributes to the protection of cells from oxidative stress.
- Biotin contributes to the maintenance of normal hair, skin and mucous membranes.
- Vitamin B6 contributes to normal cysteine synthesis and to normal energy metabolism.
- Pantothenic acid contributes to normal synthesis and to the normal metabolism of steroid hormones, vitamin D and certain neurotransmitters.
- Thiamine contributes to normal energy metabolism and normal heart function.
- Vitamin B2 (riboflavin) contributes to the maintenance of normal mucous membranes.
