Description

Coloflora Biotic – Probiotics for the Gut and Gut Microbiome

Coloflora Biotic from EnergyBalance® Switzerland is a food supplement with probiotics to support a balanced diet and as an addition to your daily routine. The modern 3-in-1 formula combines probiotic cultures with inulin and burdock root and is aimed at those who value a clearly structured and balanced composition.

The daily serving of 2 capsules provides 20 billion probiotic cultures, consisting of the selected strains Lactobacillus acidophilus and Bifidobacterium lactis. The vegetable capsules are vegan and lactose-free and suitable for a conscious diet.

A well-designed 3-in-1 formula

Not all probiotics differ only in the number of cultures they contain. Coloflora Biotic relies on a transparent composition with carefully selected ingredients:

- 20 billion probiotic cultures per daily dose
- Lactobacillus acidophilus and Bifidobacterium lactis as selected bacterial strains
- Inulin as a prebiotic fibre
- Burdock root as a botanical ingredient
- vegan and lactose-free formula

The combination of different components makes Coloflora Biotic a modern probiotic with a clearly defined formulation.

20 billion probiotic cultures per daily dose

One daily serving of 2 capsules contains:

- 10 billion CFU Lactobacillus acidophilus
- 10 billion CFU Bifidobacterium lactis
- a total of 20 billion probiotic cultures

The balanced dosage and the combination of two well-known bacterial strains make Coloflora Biotic a high-quality addition in the field of daily probiotics.

Probiotics, prebiotic and botanical component

Selected probiotics

Lactobacillus acidophilus and Bifidobacterium lactis are among the best-known probiotic cultures in relation to intestinal flora and the gut microbiome. Their combination provides a clearly defined and functional formulation.

Inulin – prebiotic fibre

Inulin is a plant-derived fibre that is frequently used in modern nutritional concepts. As part of the formula it complements the probiotic cultures and supports the balanced composition of the product.

Burdock root

Burdock root complements Coloflora Biotic with a botanical component that has traditionally been used in various nutrition-related applications.

Antibiotics and intestinal flora

Antibiotics can affect not only unwanted bacteria but also beneficial microorganisms. This can temporarily alter the natural balance of the intestinal flora. Probiotic cultures are often used as a supplement during or after an antibiotic therapy.

Why are they called lactic acid bacteria but are lactose-free?

The term "lactic acid bacteria" describes the ability of these microorganisms to produce lactic acid. It does not mean that milk or lactose must be present.

Therefore products containing lactic acid bacteria can be both vegan and lactose-free. Coloflora Biotic has been specifically developed with vegetable capsules and a lactose-free formulation.

Gut microbiome – a modern nutrition topic

The gut microbiome encompasses the entirety of microorganisms in the gut and is an increasingly important topic in research and nutrition. Probiotics, intestinal flora and lactic acid bacteria are often in focus for a mindful approach to diet.

Who is Coloflora Biotic suitable for?

Coloflora Biotic is suitable for anyone who wishes to supplement their daily diet with a modern probiotic:

- for those seeking probiotics for the gut
- for people who prefer a clearly structured formulation
- as a supplement after antibiotic therapy
- for a vegan and lactose-free diet
- for those who value inulin and botanical ingredients

EnergyBalance® Switzerland Quality

Coloflora Biotic stands for a clearly formulated composition, selected ingredients and Swiss quality standards. The pack of 120 VegeCaps is sufficient for about two months' use.

Valuable ingredients

Valuable substances*	per daily portion 2 capsules
Lactobacillus acidophilus	10 billion CFU
Bifidobacterium lactis	10 billion CFU
Inulin from agave	1 g
Burdock root	100 mg

* No reference amount specified according to the EU Food Information Regulation (LMIV)

Ingredients

Inulin, Lactobacillus acidophilus (200 billion CFU), Burdock root, Bifidobacterium lactis (500 billion CFU), Cellulose (VegeCaps-fairtradestandardFairTSA).

Recommended consumption

Take 2 capsules daily. The daily dose provides a total of 20 billion CFU.
