Description

PuraVita Eisenreich Herbal Tincture – Traditional Herbal Knowledge and Special Production

The **PuraVita Eisenreich Herbal Tincture** combines **stinging nettle (Urtica dioica), yam root (Dioscorea villosa) and AFA algae (Aphanizomenon flos-aquae)** in a special plant formulation. The carefully selected ingredients are processed using a traditional alchemical method.

High-quality plants and alchemical production

All plant parts are processed holistically during production. The traditional method combines an alcoholic plant extract with a mineral extract from the plant ash.

The production comprises four steps:

1. **Plant extract:** The plants are macerated in high-proof alcohol to extract soluble constituents.
2. **Calcination:** The remaining plant material is burned to produce plant ash.
3. **Mineral extract:** The ash is processed with purified water.
4. **Union:** Both extracts are brought together to form the finished herbal tincture.

The plants included

- **Stinging nettle:** A time-honoured wild plant of European herbal tradition.
- **Yam root:** A root plant long used in traditional plant formulations.
- **AFA algae:** A blue-green microalga with a distinctive nutrient and phytochemical profile.

Who is the herbal tincture suitable for?

- For lovers of traditional herbal formulations
- For people who wish to deliberately supplement their diet with selected plants
- For anyone who values herbal preparations and special manufacturing methods

What does alchemical production mean?

This involves combining an alcoholic plant extract with a mineral extract obtained from the plant ash.

Are all plant parts used?

Yes, the plants used are processed holistically according to the manufacturing method described.

Is the tincture vegan?

Yes, the formulation contains no animal ingredients.

How should the tincture be stored?

Store cool, dry and out of the reach of children.
