Description

Natural calcium and magnesium from fossil Sango coral

The Sango coral, from the genus of stony corals, originates in Japan on Okinawa. This is a Japanese prefecture consisting of over 150 islands in the East China Sea. The eponymous island is the largest of the group and features wide beaches and coral reefs. Around the island there are entire sandbanks of eroded Sango coral on the seabed.

Magnesium from Sango coral

Sango coral contains organic calcium and magnesium in a 2:1 ratio. This ensures optimal absorption in the body. Due to this special composition, Sango coral is very effective in the remineralisation of bones, teeth, hair and fingernails.
In addition to magnesium, the coral contains over 70 other minerals and trace elements, such as magnesium, copper, silicon, boron, germanium and iron.

Sango marine coral capsules – a natural source of calcium and magnesium

Off the coast of Okinawa, the well-known 'Island of the Centenarians', lies the origin of the Sango marine coral. The fossilised coral material is naturally rich in minerals and trace elements. The **Sango marine coral capsules from PuraVita** offer a practical and flavour-neutral way to specifically supplement your daily diet with calcium and magnesium.

What characterises Sango marine coral?

Calcium and magnesium in a 2:1 ratio

Sango marine coral contains approximately **24% calcium and 11.5% magnesium**. Calcium contributes to the maintenance of normal bones and teeth as well as to normal muscle function. Magnesium supports, among other things, the normal function of muscles and the nervous system and contributes to the reduction of tiredness and fatigue.

Rich in minerals and trace elements

In addition to calcium and magnesium, the coral powder contains further minerals and trace elements such as **zinc, copper and iron**

Natural origin and controlled extraction

The coral powder comes from fossil coral deposits off the coast of Okinawa. Only dead corals are used. Extraction is carried out in a controlled manner with particular attention to the protection of living coral reefs. The material is then processed using sterilisation and drying.

Tested quality

Each batch is tested for **purity and radioactivity**. In previous analyses the measured values were below the respective detection limits.

Calcium and magnesium contribute to:

- normal muscle function
- normal function of the nervous system
- the maintenance of normal bones and teeth
- a normal energy metabolism
- the reduction of tiredness and fatigue (magnesium)
- normal function of digestive enzymes (calcium)

For a mineral-conscious diet

The **Sango marine coral capsules from PuraVita** are suitable for anyone who wishes to specifically supplement their diet with calcium and magnesium from a natural mineral source. The capsules are flavour-neutral, convenient

to use and are produced under controlled conditions.

Naturally sourced – mineral-rich – quality-tested.

Nutritional information

Micronutrients	per daily serving 4 capsules
Calcium	797 mg (100 %*)
Magnesium	375 mg (100 %*)

*Reference intake value according to Regulation (EU) No. 1169/2011

Ingredients

Sango marine coral powder, hydroxypropylmethylcellulose (capsule shell)

Recommended intake

Take 2 capsules twice daily with plenty of liquid. If you have low stomach acid (common symptom: heartburn), take with a 1-hour interval from meals. Tip: Combining with organic acids, e.g. from fermented products/drinks, facilitates absorption in the intestine.

Storage instructions

Store in a cool, dry place, protected from light (do not refrigerate).

Legal notice

The recommended daily intake must not be exceeded. Food supplements are not a substitute for a balanced and varied diet and a healthy lifestyle. Keep out of reach of young children.

Product information

Application:	Children, Bones & Joints, Pregnant, Sport
Dosage form:	In vegan capsules.
Micronutrients:	Calcium, Magnesium
Quality:	Free from magnesium stearate, Gluten-free, Lactose-free, Vegan
Product type:	Dietary supplements
