Description

Pure 1,3/1,6 Beta-Glucan, high-dose, without additives or fillers

Beta-glucan is a polysaccharide composed of a main chain of linked glucose units with a low proportion of inter- and intramolecular 1,3- and 1,6-branches.

Beta-glucan 1,3/1,6 is a highly active form of beta-glucan. It was manufactured using a special process which removes and purifies mannoproteins and yeast residues from the yeast cell wall.
