Prices incl. VAT plus shipping costs

Description

With 80% silymarin and extracts of turmeric and artichoke

The patented turmeric extract Curcugreen® (formerly BCM95®) with 95% curcumin contains, due to its special production process, approx. 8% essential oils that include all constituents of the turmeric rhizome. As a result, Curcugreen® has a seven times higher bioavailability than conventional curcumin products and a more than twice as long residence time in the bloodstream. With a high content of 5% cynarin, the artichoke extract is also highly concentrated.
