Overview

VegiPro pea, pumpkin and hemp protein, 1 kg powder

Product number: PM1006

Price

€59.90

Prices incl. VAT plus shipping costs

Description

NATURA FELIX VegiPro: Protein powder without soy, optimised to supplement a vegan diet.

People living vegan often have difficulty obtaining sufficient amounts of certain nutrients from their food, as some of these are present only in small quantities or not at all in plant-based products. These especially include vitamin B12, taurine and the amino acids L-cysteine, L-carnitine and creatine, which are mainly found in animal foods.
It is not easy to replace animal nutrients with plant-based ones. This requires careful meal planning and the use of

fresh ingredients. In everyday life, however, vegans often do not differ from meat-eaters. After a busy day at work they also reach for “vegan fast food”. A quickly prepared vegetable stir-fry, which loses many vitamins when heated strongly, and a few nuts alone are not enough in the long term to cover the specific nutrient requirements.
NATURA FELIX VegiPro is a soy-free protein powder specially tailored to the needs of vegans. Its ingredients can help to offset common nutrient deficits in a vegan diet.
It is also an excellent option for anyone who prefers a plant-based protein powder.

The special properties of Natura Felix VegiPro:

- Pea protein, pumpkin seed protein and hemp protein (three very good plant protein sources) without soy
- contains 60% protein (60 g per 100 g)
- high content of BCAAs (branched-chain amino acids)
- high content of L-tryptophan and L-lysine
- bioactive vitamin B12 (indispensable for vegans)
- vegan vitamin D3
- extra taurine, creatine and acetyl-L-carnitine (otherwise only found in animal products)
- with MCT oil
- neutral, creamy taste (slightly sweet and vanilla-like)

NATURA FELIX VegiPro offers an excellent plant protein powder with all necessary amino acids

To ensure you obtain sufficient amino acids from plant proteins, you must always combine two or more types of protein. This makes their biological value similar to that of whey protein. The pea protein used contains a lot of L-lysine (like all legumes), but little L-methionine and L-cysteine. To compensate for this, we use organic pumpkin seed protein and hemp protein, which contain all essential amino acids our body needs. We have deliberately refrained from using inexpensive soy.
Compared to other plant protein sources, VegiPro has a very high amount of branched-chain amino acids such as leucine, isoleucine and valine. These BCAAs are abundant in hemp and pea protein. They are the only amino acids (similar to MCT oil from coconut oil) that are not processed in the liver but are immediately available for energy. This is particularly important for vegan athletes during strength and endurance training.
Pumpkin seed protein also contains a lot of L-tryptophan and has an exceptionally high biological value of 137. This number shows how well our body can utilise proteins from a particular food source (for comparison: a chicken egg has a value of 100, whey protein 103).

VegiPro plant protein shake also scores highly with many bioactive vitamins.

Important vitamins and minerals for vegans for optimal basic supply

It is well known that vegans often have a deficiency of vitamin B12, which among other things causes problems in folate metabolism. Therefore VegiPro contains easily absorbable vitamin B12 (methylcobalamin) and natural folate instead of synthetic folic acid. Vitamin B6 (as pyridoxal-5-phosphate) is very important for protein metabolism and helps in the utilisation of plant proteins.

As with non-vegans, additional intake of vitamin D is particularly advisable in winter. Since vitamin D2 from plant-based foods is poorly absorbed by the body, we use vegan vitamin D3 for our protein powder, which is much better utilised.

To complete the nutrient offering, NATURA FELIX VegiPro contains further essential vitamins and minerals for vegans. These include natural beta-carotene (a precursor of vitamin A) from a concentrate of the green alga Dunaliella salina and vitamin C from an acerola cherry extract.

Zinc and iron have been added because they are difficult to absorb from plant foods. To improve their utilisation, zinc is bound to the amino acid L-methionine and iron (Core Chelate®) is bound to a bisglycinate. Calcium and magnesium are present in an ideal ratio of 3:1.

MCT oil (from coconut oil) promotes the absorption of plant proteins and provides energy. It is absorbed directly into the bloodstream and processed by our cells into energy.

NATURA FELIX VegiPro is tasty and filling.

This plant protein blend can be used in many drinks and dishes without affecting the flavour too much (for example in fruit juices, smoothies, shakes or even savoury dishes). Thanks to the included coconut milk powder it is always creamy, even when mixed only with water. For the neutral, slightly sweet taste we use only real vanilla flavouring and the natural sweetness of stevia.

Each serving contains only 147 calories (615 kJ), making VegiPro suitable as a meal replacement in a lower-calorie diet. Please drink enough (about 2–3 litres per day)!

VegiPro contains no additional substances. However, our vegan protein powder is not suitable for people who are sensitive to legumes.

New packaging – better for nature

The new stand-up pouch made from a single material can be fully recycled. This packaging saves material, reducing CO2 emissions during transport and production as well as plastic waste compared with conventional cans.

Currently NATURA FELIX VegiPro is the only protein powder specifically developed for the nutrient needs of vegans (manufacturer information as of 02/2026).

Nutritive properties

- Proteins contribute to an increase in muscle mass
- Proteins contribute to the maintenance of muscle mass and normal bones

Ingredients

Pea protein powder, pumpkin protein powder, hemp protein powder, L-lysine, coconut milk powder, MCT powder, L-leucine, vanilla extract powder, guar gum, calcium citrate 4-hydrate, glycine, acetyl-L-carnitine, creatine, L-isoleucine, L-valine, taurine, L-glutamine, acerola extract, magnesium carbonate, sea salt, Dunaliella salina, iron bisglycinate, stevia extract, zinc monomethionine, nicotinamide, cholecalciferol (vegan), sodium selenite, calcium D-pantothenate, pyridoxal-5-phosphate, copper citrate, riboflavin, thiamine hydrochloride, 5-methyltetrahydrofolate, calcium salt, chromium picolinate, potassium iodide, methylcobalamin.

Recommended consumption

Preparation of a meal for a weight-control diet: 33 g powder (approx. three heaped tablespoons) and 250 ml liquid (e.g. juices, soy, spelt or oat milk) stir smooth with a high-quality oil (according to taste flaxseed oil, nut oil, etc.).

Manufacturer’s notes

Please note that Natura Felix VegiPro is intended only as a dietary supplement. Other foods must be part of this diet. For a shake about three heaped tablespoons (approx. 33 g) should be dissolved in a liquid. In general,

sufficient fluid intake should be observed (2–3 litres daily).
Not suitable for children under 10 years of age.

Note from EnergyVital

Some people cannot tolerate cucurbits or legumes such as peas. We recommend one of our other products that are free of these, e.g. Woscha High Potential Protein 170 or Ultimate Protein Blend from Vitals

Storage instructions

Store cool, dry and protected from light (do not refrigerate).

Legal notice

The recommended daily amount must not be exceeded. Food supplements are not a substitute for a balanced and varied diet and a healthy lifestyle. Keep out of reach of small children.

Product information

Application:	Diet & Weight, Sport
Dosage form:	In powder form.
Micronutrients:	Calcium, Chrome, Copper, Folic acid, Iodine, Iron, Magnesium, Niacin, Pantothenic acid, Riboflavin, Selenium, Thiamine, Vitamin A, Vitamin B6, Vitamin B12, Vitamin C, Vitamin D, Zinc
Plants:	Algae, Coconut, Hemp, Peas, Pumpkin
Quality:	Free from magnesium stearate, Gluten-free, Lactose-free, Vegan
Product type:	Dietary supplements
