From 5	€32.31	€293.73 / 1 Kilogramm

Prices incl. VAT plus shipping costs

Description

L-carnitine is an amino acid that is found mainly in meat

In our body L-carnitine is found mainly in muscle tissue. There it is responsible for the transport of long-chain fatty acids into the mitochondria. L-carnitine can be synthesised from the amino acids lysine and methionine. In stressful situations the body requires particularly large amounts of lysine and methionine. As a result, L-carnitine production suffers.

WOSCHA L-carnitine is characterised by excellent quality. Highly pure **L-Carnipure®-tartrate** is used. Manufactured by the Swiss company Lonza, it is the only product on the market that contains the L-isomer of carnitine. That is exactly how it occurs in nature! Natural carnitine can be better absorbed by the body and thus ensures optimal bioavailability.

L-Carnipure Plus also contains vitamin C and chromium. Vitamin C contributes to normal energy metabolism and chromium to the normal metabolism of macronutrients.

Nutritional properties

Vitamin C

- contributes to normal energy metabolism.
- contributes to the normal functioning of the nervous system.
- contributes to normal psychological function.
- contributes to the normal functioning of the immune system.
- contributes to the protection of cells from oxidative stress.
- contributes to the reduction of tiredness and fatigue.

Chromium

- contributes to the normal metabolism of macronutrients.
- contributes to the maintenance of normal blood glucose levels.

Nutrition declaration

Micronutrients	per daily portion (1 capsule)
