Description

Building block for important proteins and metabolic processes

L-tyrosine is one of the semi-essential, proteinogenic amino acids and is involved in the formation of numerous proteins. In addition, L-tyrosine serves as a precursor to various messenger substances (neurotransmitters) and hormones.

The optimised formulation is complemented by **Vitamin B3 (Nicotinamide)**. Vitamin B3 contributes to normal energy metabolism, normal functioning of the nervous system and normal psychological function. In addition, it contributes to the reduction of tiredness and fatigue and to the maintenance of normal skin and mucous membranes.

L-Tyrosine Plus is suitable as a dietary supplement, particularly in the case of an unbalanced diet or increased physical strain, and is a sensible addition to the daily diet.

- **without additives**
- **with Vitamin B3 for normal energy metabolism and normal functioning of the nervous system**
- **suitable for allergy sufferers, vegetarians and vegans**
- **also suitable for longer-term use**

Pure substance without unnecessary additives

In NATURA FELIX L-Tyrosine Plus, additives such as preservatives and stabilisers, for example magnesium stearate, are omitted. Both the capsule contents and the capsule shell contain **no animal-derived ingredients** and are therefore suitable for vegetarians and vegans.

The semi-essential amino acid L-tyrosine

L-tyrosine is predominantly found as a component of proteins. Since the body can produce L-tyrosine from L-phenylalanine, this amino acid is generally not classed as an essential amino acid. However, if there is an insufficient supply of L-phenylalanine, L-tyrosine can be obtained through the diet.

Tyrosine-rich foods include pork, poultry, oily sea fish and eggs. Plant foods such as soybeans, peas, brown rice, walnuts and pumpkin seeds also contain L-tyrosine.

NATURA FELIX L-Tyrosine Plus offers a practical way to ensure daily intake of L-tyrosine and complements the formulation with nicotinamide (vitamin B3), which contributes to normal energy metabolism and to the reduction of tiredness and fatigue.

Nutritional declaration

Micronutrients	per daily portion (1 capsule)
Niacin	2.4 mg (15%*)

*Reference value according to Regulation (EU) No. 1169/2011

Active ingredients

Active substances*	per daily portion (1 capsule)
L-tyrosine	500 mg

* No reference intake according to the FIC is specified
