To 1	€42.30	€1,692.00 / 1 Kilogramm
From 2	€38.00	€1,520.00 / 1 Kilogramm

Prices incl. VAT plus shipping costs

Description

What is Astaxansor?

Astaxansor eye capsules are dietary supplements specially designed to complement nutrition in the area of visual function. They typically contain a combination of micronutrients, plant extracts or secondary plant compounds that naturally occur in the eye or are associated with the normal function of the visual system.
The focus is on macular pigments such as lutein and zeaxanthin. These carotenoids are natural components of the retina, particularly the yellow macula. In addition, vitamins and minerals such as zinc are often used, as authorised claims exist for them regarding the maintenance of normal vision.

The need is often discussed in the context of changing visual habits. Longer screen time, artificial light and prolonged visual strain shape the daily lives of many people. Eye capsules are therefore not to be regarded as a substitute for a balanced diet, but as a targeted supplement within a holistic lifestyle.

For Astaxansor, a clear declaration of the ingredients and their amounts is crucial. Transparency, legally permissible claims and a comprehensible composition play a central role, as the field of vision is sensitive and a clear distinction between nutrition and medical treatment remains necessary.

Holistic nutrient complex for the eyes

The formula combines macular pigments, essential micronutrients and a plant extract into a comprehensive and balanced composition.

Precisely dosed macular pigments from Tagetes

We use lutein and zeaxanthin from Tagetes extract, precisely dosed at 10 mg lutein and 1.5 mg zeaxanthin per daily dose.

Legally authorised health claim for zinc

Zinc contributes to the maintenance of normal vision.

Nutritional declaration

Micronutrients	per daily portion 1 capsule
Vitamin C	93 mg (116 %*)
Vitamin D	6.5 µg (130 %*)
Vitamin E	5.5 mg (46 %*)
