Description

Natural support for the immune system, collagen formation and skin regeneration

L-lysine is one of the essential amino acids that we must obtain from our diet. It is found mainly in animal foods, but also in lentils and soybeans. L-lysine is a building block of many proteins, enzymes, messengers, hormones and transport molecules.
Vitamin C supports the development of our immune system. It is involved in the formation of bone, cartilage and

connective tissue and protects our cells against oxidative stress.

The nutrient combination of L-lysine with vitamin C and zinc

- supports collagen formation for the normal function of the skin (vitamin C)
- plays a role in skin regeneration (vitamin C, zinc)
- contributes to the normal function of the immune system (vitamin C, zinc)
- can neutralise free radicals (vitamin C, zinc)
- is important for cell division (zinc)

L-Lysine Plus is highly dosed and even more effective thanks to vitamin C and zinc.

Unlike other L-lysine preparations, L-Lysine Plus additionally contains vitamin C and zinc citrate.
L-lysine as monohydrochloride is easily absorbed by the body and is directly available to metabolism. Zinc citrate also supplies the body with zinc, which, like vitamin C, contributes to a normal immune system.

L-Lysine Plus contains no additives. The capsule shell is made from cellulose, making them suitable for vegetarians and vegans.

Why the combination of L-lysine with vitamin C and zinc?

L-lysine is an essential amino acid. It occurs almost exclusively in animal foods such as meat, fish, dairy products and eggs. It is barely present in plant foods. Therefore the risk of an L-lysine deficiency is increased in vegetarians and vegans. Together with L-methionine, L-lysine is important for the formation of L-carnitine.

Vitamin C, in turn, contributes to normal collagen formation for the normal function of skin, gums, teeth, bones, cartilage and blood vessels. It supports our immune system and also helps protect cells from oxidative stress by scavenging aggressive free radicals.

Zinc is involved in cell division and DNA synthesis and helps maintain normal skin. It can also protect cells from free radicals and is important for the normal function of our immune system.

L-Lysine Plus is an especially pure, well-tolerated preparation that ensures the daily supply of L-lysine.

Nutritional declaration

Micronutrients	per daily portion 3 capsules
Vitamin C	60 mg (75 %*)
Zinc	1.5 mg (15 %*)

*Reference value according to Regulation (EU) No. 1169/2011

Active ingredients

Active substances*	per daily portion 3 capsules
L-lysine	1500 mg

* No reference amount specified according to the Food Information Regulation (LMIV)

L-lysine HCl, hydroxypropylmethylcellulose (veg. capsule), ascorbyl palmitate, zinc citrate dihydrate.

Recommended intake

3 EMBO-CAPS daily on an empty stomach with fruit juice or water.

Storage instructions

Store in a cool, dry place, protected from light (do not refrigerate).

Legal notice

Do not exceed the recommended daily intake. Food supplements are not a substitute for a balanced and varied diet and a healthy lifestyle. Keep out of reach of young children.

Product information

Dosage form:	In vegan capsules.
Micronutrients:	Vitamin C, Zinc
Quality:	Free from magnesium stearate, Gluten-free, Lactose-free, Vegan
Product type:	Dietary supplements
