Description

Effective blend of plant extracts (pumpkin seed, saw palmetto and pygeum)

The Men’s Formula Pro Prostate comprises an effective blend of plant extracts (pumpkin seed, saw palmetto and pygeum), specifically formulated to support the health of the prostate and lower urinary tract. In addition, saw palmetto helps to maintain normal hair. Finally, this supplement contains beta-sitosterol derived from pine.

Prostate

The prostate, a gland, is located beneath the bladder. The urethra runs centrally through the prostate. The prostate is of great importance to the male reproductive system. Prostatic fluid is produced in the prostate and is mixed with the sperm during ejaculation. This fluid plays an important role in protecting sperm cells and promoting their motility. It is important that the prostate remains a normal size, as it affects urination and the urethra is surrounded by prostate tissue. Men’s Formula Pro Prostate contains several herbal extracts that help maintain good prostate function. Their synergistic effect can be fully realised when these extracts are combined in a single product.

Pumpkin seeds

The pumpkin seed extract contained in Men’s Formula Pro Prostate under the brand name Go-Less® Men (also known as EFLA®940) is produced using EFLA® HyperPure technology. The cleaning of the pumpkin seeds is carried out effectively without the use of toxic solvents or other environmentally harmful substances. This process also ensures that the phytonutrients in the pumpkin seeds are preserved to achieve optimal efficacy of the extract. Go-Less® Men has been investigated in various clinical studies, and the results show that this pumpkin seed extract does indeed support urinary tract and prostate health.

Saw palmetto

The extract obtained from the fruits of saw palmetto (Serenoa repens) is probably the most commonly used herbal preparation for the prostate. Like the pumpkin seed extract, saw palmetto is beneficial for the prostate and can contribute to the maintenance of normal urination. The free fatty acids are the principal active constituents in saw palmetto extract. A high-quality extract should be standardised to these. An additional benefit is that saw palmetto contributes to the preservation of normal hair. Men’s Formula Pro Prostate is therefore also suitable for men who wish to support their hair growth.

Pygeum africanum

The pygeum extract, obtained from the bark of an African tree, has a long tradition of use. Pygeum enhances the effects of pumpkin seed and saw palmetto by supporting not only the prostate and urinary tract but also bladder function.

Beta-sitosterol

Men’s Formula Pro Prostate also contains beta-sitosterol, a substance that naturally occurs as a structural component of the cell membranes of certain plants. Notably, beta-sitosterol is also present in pygeum bark and saw palmetto berries. The beta-sitosterol used in this men’s formula, Phytopin®, is derived from pine. Phytopin® is characterised by high purity and consistent quality, making it an excellent complement to the other ingredients in Men’s Formula Pro Prostate.

Active ingredients

Ingredients*	**per daily serving (2 capsules)**
Pumpkin seed extract (Go-Less. Men, 3% polyphenols [enterodiol] and 0.1% adenosine)	500 mg
Saw palmetto extract (45% free fatty acids)	320 mg
Beta-sitosterol (Phytopin®)	130 mg
Pygeum africanum extract	100 mg
